

PLEASE READ this sheet prior to assembly to familiarise yourself with the various stages of construction. Carefully open the pack supplied and check the contents against the parts and fittings check list.

Do not destroy any of the packaging until you are certain that you have all the necessary parts for the assembly.

Please ensure that the packaging is disposed of in a safe environmentally friendly way.

CAUTION: There are small components used in the construction of this unit. These loose items should be kept away from young children during assembly, to avoid the danger of choking.

IMPORTANT: BEFORE STARTING TO ASSEMBLE THE BED - PLEASE READ THESE INSTRUCTIONS CAREFULLY.

Care & Maintenance

In the unlikely event of missing or damaged parts, please contact your retailer. Please have this guide at hand quoting the part code reference numbers shown when requesting spare or replacement parts.

Warnings

NOTE: Before moving the slat frame, place the mattress on the slats. Without a mattress in place, the speed of movement is quick and may cause injury so great care is needed. Carefully lower the frame with the fabric hand-strap (10) ensuring the frame sides are aligned with the side panels; there should be an even gap on each side. If not aligned, check bed is still square (see Stage 3) and if it is, but gaps are still not even, re-align. Depending on the weight of the mattress, the rising speed will vary so be careful until you get used to the speed.

Always use the hand-strap to lift or lower the frame - keep fingers well away from the moving parts.

When fully assembled and the mattress in position, please raise & lower the ottoman 4/5 times to ensure the gas pistons are fully lubricated.

General Hints & Tips

Two person assembly

Please retain your assembly instruction and tools provided for future use. Periodically check that all bolts are still tight.

i) Fitting position for the slat-frame cross bar (7) is clearly labeled. At the end of the slat frame (5), pass the bar through the gap between second & third slat. Carefully open the frame.

ii) To top of the slat frame, fit two connection plates (6) using four bolts (C). Screw the bolts into the threaded inserts on top of the frame.

Please do not tighten 100% yet.

iii) The cross bar fixing plates sit on top of each side of the slat frame (5), sit the plates on the round labels. Align with the threaded holes and loosely fix through the plates using two bolts (C).

Using Allen key (E), tighten all six bolts 100%.

Slide gas-lift piston stem (x) onto the axle (y) then fit the flange lock-nut (D). Tighten nut with spanner (F) - do not over-tighten

A small gap must be left so stem can move freely - this is normal, see sketch below.

Stage
7

Loosely fit three bolt sets on each side (A), (D) & (G), carefully hold frame down and align so there even gaps at each side then tighten all bolts 100%
